Quote from the jury report:

Ladislav Železný and his team manage to create a flowing dreamscape, a fascinating journey into the musical substance of nature, its animals and plants. Based on the idea, that instruments and nature speak the same language, this programme illustrates the poetic potential of animals, trees, and flowers. Composed in a meditative orientation, nature becomes part of this score-like sounds, which is also a strong invitation to reflect on our responsibility towards nature.
